DETAILED ACTION

Claim Rejections - 35 USC § 102 and 35 USC § 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

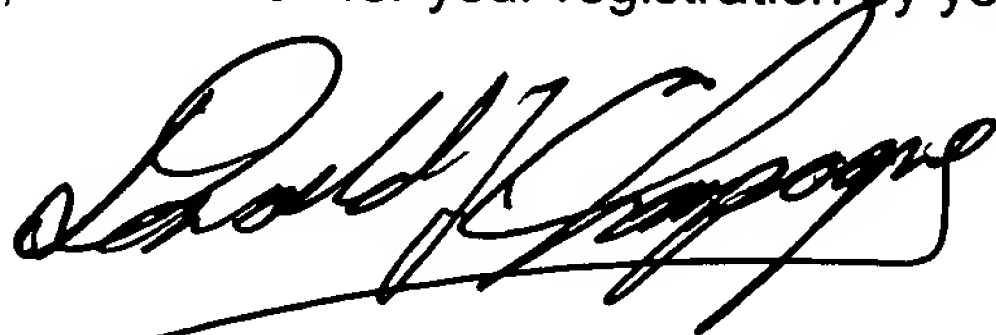

3. Claims 1-13, 15-28 and 30-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Thibadeau et al.
4. Thibadeau et al. teaches (Independent claims 1, 16, 31 and 32) a method of and a system for displaying location based information from an information site on a network, a computer readable data storage medium having a programmable code of the method thereon, the method comprising: determining location data of a user of the location based information (col. 4 lines 31-36 and 44-47); generating location based information based on the determined location data of the user, and providing the generated location based information to the user over the network (col. 5 line 58 to col. 6 line 10).
5. Thibadeau et al. also teaches at the citations given above, and at col. 10 line 65, claims 2-8, 10, 12, 13, 15, 17-23, 25, 27, 28, 30 and 33. Thibadeau et al. also teaches claims 9 and 24 (col. 7 line 18) and claims 11 and 26 (col. 5 lines 42-44).
6. Claims 14 and 29 are rejected under 35 U.S.C. 103(a) as being obvious over Thibadeau et al. Thibadeau et al. does not teach the Internet. However, the reference does teach WANs (col. 7 line 19), of which the Internet is comprised. Because using a system of WANs, which reads on the Internet, would facilitate use of the system, it would have been obvious to one

of ordinary skill in the art, at the time of the invention, to add the Internet to the teachings of Thibadeau et al.
